

Ornament:

Ornaments are in particular used in our new framed CAS sessions, which are extensively used in the Mathemagix documentation. Appropriate conversion of ornaments to both LaTeX and Html is therefore important, at least standard ornaments with specified background colors, padding and border.

Ornament:

Ornaments are in particular used in our new framed CAS sessions, which are extensively used in the Mathemagix documentation. Appropriate conversion of ornaments to both LaTeX and Html is therefore important, at least standard ornaments with specified background colors, padding and border.

Theorem 1 (Ornament)

Ornaments are in particular used in our new framed CAS sessions, which are extensively used in the Mathemagix documentation. Appropriate conversion of ornaments to both LaTeX and Html is therefore important, at least standard ornaments with specified background colors, padding and border.

Theorem 2 (Ornament (bis))

Ornaments are in particular used in our new framed CAS sessions, which are extensively used in the Mathemagix documentation. Appropriate conversion of ornaments to both LaTeX and Html is therefore important, at least standard ornaments with specified background colors, padding and border.
